If the well is a flowing artesian well, it shall be so constructed and equipped that the flow may be shut off when not in use without loss of water into sub-surface formations or at the land surface.
The well should be constructed to a depth adequate to allow for the maximum development and beneficial use of ground water in the source of supply.
Granting of a permit does not guarantee the right to have the water level or artesian pressure in the well maintained at any specific level. The well shall be constructed to a depth adequate to allow for the maximum development and beneficial use of ground water in the same source of supply and is subject to regulation and correlation with surface water rights, if the ground and surface waters are interconnected. The use of water hereunder is subject to the further provisions of Chapter 169, Session Laws of Wyoming, 1957, and any subsequent amendments thereto.
This application is approved subject to the condition that the proposed use shall not interfere with any existing rights to ground water from the same source of supply and is subject to regulation and correlation with surface water rights, if the ground and surface waters are interconnected.
